

## Highly motivated JAVA developers

UXsuite, an Eindhoven University of Technology spinoff (since 2009), wants you!

UXsuite provides novel tools to observe how connected products are used and perceived by their end-users in the field. We enable an intelligent testbed in the development of new products (e.g., mobile and desktop software, web apps, and consumer electronics) and facilitate their continuous improvement based on concrete field-feedback. We provide a full software stack for remote product observation, as well as a specification and analysis front-end for professional stakeholders of product design, development, and maintenance. Long story short: we work for a great user experience in our clients' products and services. See more at [www.uxsuite.com](http://www.uxsuite.com).

Being a UXsuite developer you will further develop the UXsuite toolset, work a lot with open source tools, engineer distributed systems, design user interfaces, and more – all exciting stuff! You will work in an agile and fun work environment, and get to shape the future of product experience analytics!

## As a startup we offer you

- A lot of freedom and responsibility
- A lot of influence on our products and services
- Inter-/national clients and exposure to potential projects
- Great colleagues and a cozy work environment
- Facilities of the TU/e campus, where UXsuite is housed

## We expect you to have

- A strong track record of dedication to projects or comparable
- A MSc degree in computer science or similar qualifications
- Fluency in JAVA
- Strong written and spoken communications skills in English
- Experience in web applications, web security, Eclipse technology, Software modeling (*as a plus*)

## Interested? Get in touch!

Send your CV and a brief motivation letter to Aylin Koca ([a.koca@uxsuite.com](mailto:a.koca@uxsuite.com)), and wait to be contacted to know if you are invited for an interview.
